Patiënt:

Talentina (2402742)
Paard, Westfaler
Merrie, 24-5-2019
558 kg
Microchip: 276020000567703

Dear Sir/Madam,

On the 11th of June 2022 above mentioned mare Talentina has been inseminated with semen of the stallion Pegase van het Ruytershof.

On the 20th of June 2022 she has been flushed for embryo transfer. This procedure has given an embryo that has been transferred into the recipient mare Darlien (registration number 528003000800216, microchip number 528210002132041).

On the 23th of June, the 12th of July and the 11th of August 2022 the recipient mare Darlien has been checked for pregnancy and was confirmed to be pregnant, sexed as a filly.

If you have any further questions or want to make an appointment please contact us by phone on 0031 30 253 1188 on weekdays between 8.00-16.00 h or by e-mail to voortplanting.paard@uu.nl.

Thank you for the confidence you placed in us,

With kind regards,

Equine Reproduction
